

## GETTING THE MOST OUT OF GUARDSMAN DIQUAT

RATE	Water Volume	Optimize Your Application	Timing
<ul style="list-style-type: none"> <li>• 0.7 to 0.9 L/acre</li> <li>• Denser foliage and weed growth requires higher rates</li> <li>• Use a non-ionic surfactant at 0.1% v/v</li> <li>• Choose a surfactant with &gt;90% concentration</li> </ul>	<ul style="list-style-type: none"> <li>• Water volume and coverage is critical</li> <li>• By Ground: Minimum 20 gals. /acre</li> <li>• By Air: 4 gals. /acre</li> <li>• Use clean water</li> </ul>	<ul style="list-style-type: none"> <li>• Cloudy or evening timing preferred</li> <li>• Rain fast minimum 15 minutes</li> <li>• Target Droplet size is medium coarse</li> </ul>	<ul style="list-style-type: none"> <li>• Optimum timing of application will maximize yield and quality</li> <li>• See the label for specific crop maturity requirements</li> </ul>

**GUARDSMAN Diquat is a true desiccant for quick dry down to allow you to manage your pulse crop harvest and the timing of your harvest operations.**

1. Timing is critical for optimum results.
2. See the label for specific crop maturity recommendations.
3. Maximizes pulse yield and also minimizes grade loss.
4. Do not apply to more acres than can be harvested in a day.
5. Safe to use as pre-harvest desiccant for seed crops.
